SCENE DETAILS AS REPORTED BY RESPONSE MANAGER

Scene Description:

LSHR arrived on-site hauling a utility trailer carrying a skid steer and found a trail of diesel that was covered by clay absorbents. The diesel impacted area was approximately 300 ft.

Scene Activities:

LSHR donned level D PPE and used the skid steer with broom attachment and hand tools to collect the impacted clay absorbent, which was placed into (2) 55-gallon drums. A surface cleaner and heated pressure washer were used to scrub the impacted area. LSHR recovered the impacted wash water into an 800-gallon vacuum trailer. The recovered wash water was placed into a separate 55-gallon drum. LSHR collected (2) 55-gallon drums of spent absorbent and (1) 55-gallon drum of washwater. The customer representative took possession of all (3) drums of waste. No waste remained with LSHR. A washout was performed on the 800-gallon vacuum trailer.

For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Dear Valued Customer,

Lone Star Hazmat Response has always strived to provide you with outstanding service, as we are proud to be your emergency environmental response, remediation, and waste hauling partner. Our mission is to provide safe, timely, and cost-effective environmental solutions.

For the entire month of March, we held off and watched the price of diesel, but it has become impossible for us to continue to operate without accounting for the increase we are all aware of. As you will see, your invoice includes an 8% increase for Fuel Surcharge. This still does not cover the entire increase in fuel cost. We will continue to monitor the cost of diesel, and when able, will hope to reduce the fuel surcharge.

We value our relationship with our customers and strive to continue to provide you with the highest quality service. Should you have any questions, please do not hesitate to call us.

Sincerely,

Michael Romines
